

Urban Food System Innovations and Knowledge Coproduct

R

researchers and New Jersey communities discuss knowledge co-production and frontier research on sustainable, healthy and equitable urban food systems. Topics include community engaged research on urban food systems; health, wellbeing, and equity benefits of urban agriculture; frontier technologies for food waste management; and behavioral nudging for healthy and sustainable diets, presented by leading researchers from Princeton University and our NSF-USDA INFEWS network partners in New Jersey and Minnesota.

MARCH 31, 2023

Friend Center
Convocation Room
Princeton University

OPEN TO THE PUBLIC
PANEL 1: 9:00-10:30 AM
How to Do Policy- and Community-Engaged Research on Food?

Faculty members from diverse disciplines discuss co-production with policymakers and communities, sharing their real-world experiences.

PANEL 2: 10:45 AM-12:15 PM
**Community Food Action Priorities:
Perspectives from New Jersey and India**

Hear from representatives from Newark, Trenton, Hudson County, and New Jersey statewide food programs, as well as the Indian cities of Bengaluru, Kochi, and others.
